Step 9: ---MOST IMPORTANT STEP---

Write your product keys down in a safe place (on paper, not just copied into notes on your computer) for future reference, you will need these keys when installing your software.

You only have access to these keys for 30 days, once this time has expired if you have not written them down you will have to pay to get new ones.

Notes:

- If you delete the software and want to re-install it, you will need the key.
- If your computer dies and you get another computer you will need to install on the next computer, you will need the key.
- If your computer dies and is restored to factory defaults you will need to re-install, you will need the key.

Step 10: Either collect your software from one of the computer staff or download it using the secure download manager.

Note:

- It is much quicker and easier to collect the software from school
- The software files are between 1 -5 GB, this may take a while to download using your home internet connection.
